Title : Fundamentals of Applying IBM Security Systems Identity and Access Assurance

Vendor : IBM

Version : DEMO

NO.1 A corporate policy states that the service desk resets passwords after five failed logon attempts

Which IBM Security Access Manager report provides the user identity qualifying for a password reset?

- A. Locked Account History
- B. User Password Change History
- C. Failed Authorization Event History
- D. Failed Authentication Event History

Answer: A

NO.2 A customer has multiple Active Directory sites across the globe. The customer has to provision users to these sites that are geographically dispersed.

Which policy would be appropriate to use to achieve using IBM Security Identity Manager?

- A. Provisioning Policy
- B. Recertification Policy
- C. Service Selection Policy
- D. Separation of Duty Policy

Answer: A

NO.3 A customer uses IBM Security Access Manager (ISAM) for Web Application protection and Single Sign-On. Because of recent mergers and acquisitions, many more applications have been configured with ISAM and the user base has almost doubled in last two months. After the merger, a number of users reported website down issues on a daily basis.

Which two issues need to be taken into consideration after such a change in the system configuration? (Choose two.)

- A. Scalability of ISAM components
- B. Availability of ISAM components
- C. Reduction of data handled by the ISAM components
- D. Encryption of communication between ISAM components
- E. Improvement in the hardware used by the users to access the websites

Answer: B,D

NO.4 The customer has an ongoing implementation of IBM Security Access Manager for Enterprise Single Sign-On. The implementer needs to create, import, and view the access profiles that will be used and loaded.

Which component needs to be installed to help the administrator create, import, and view the access profiles?

- A. ProfileWizard
- B. AccessStudio
- C. AccessWizard
- D. AccessCreator

Answer: A

NO.5 What is a prerequisite for installing an IBM Security Identity Manager fix pack?

- A. Stop the LDAP server that is used to contain the Security Identity Manager data
- B. Make sure that the WebSphere server that is running the Security Identity Manager application is running
- C. Install the WebSphere Update installer for the appropriate WebSphere version as per the readme file of the fixpack
- D. Ensure that the SOAP request timeout value is set to 150 or less by using the com.ibm.SOAP.requestTimeout property

Answer: C

NO.6 Which two attributes are minimally required to create an identity in IBM Security Identity Manager? (Choose two.)

- A. User's full name
- B. User's last name
- C. User's first name
- D. User's e-mail address
- E. User's employee number

Answer: B,C

NO.7 Which two factors affect Security Access Manager for Enterprise Single Sign-On performance? (Choose two.)

- A. The total number of users with cached wallets
- B. The number of cached wallets on a workstation
- C. The synchronization schedule with the IMS server
- D. The number of times a user logs into the same workstation
- E. The number of concurrent users logged on with cached wallets

Answer: C,D
